

If you have one of these,

you could get one of these!

Color Flip Phone
Just \$999

IMPORTANT notice regarding E-911 Services and your NTELOS wireless phone.

Did you know that when Enhanced 911 services are available, your current wireless phone may not be able to utilize the Enhanced system? E-911 enables emergency operators to receive a mobile caller's approximate location and wireless number when calling for help.

To fully utilize all of the E-911 services, you'll need a phone with Global Positioning System (GPS) capabilities. If your phone is more than two years old, it may not be equipped with GPS capabilities.

To determine if your phone is equipped with GPS, simply check your User's Guide or bring it by any NTELOS retail location for a FREE GPS Inspection. If your phone is not GPS-capable, you can replace it with a new phone at promotional pricing with a contract extension. What a great opportunity to get a new color phone!

Wireless E-911 services may not yet be available for all areas. For more information on E-911 services, contact the FCC's Consumer Call Center at 1-888-CALL-FCC (voice) or 1-888-TELL-FCC (for the deaf) or visit the FCC Web site at www.fcc.gov/911/enhanced.

Thank you. We appreciate your business and look forward to seeing you soon.

Rob Cale
